### **MEDICARE GUIDELINES**

All therapists in private practice have to follow strict Medicare guidelines on frequency and duration of therapy prescribed by the M.D. The Medicare Review boards have the right to arbitrarily deny and take payments back if not all requirements are met. The new standards are all based on providing the most basic services and provide a home exercise routine to independence as quickly as possible.

Currently we aim to have 10-12 sessions approved.

Our wellness program allows you to continue on a fee for service basis. We encourage you to maintain your therapy gains using our skilled trainers and therapists: \$95.00/session or \$450.00 prepaid for 5 sessions (saving you \$5.00 per).
